DANNY ROGAAR

Groningen
12-12-1992
+31(0)641049868

Being from Artificial Intelligence, I enjoy finding solutions. To this end I have an investigative look on problems and also think about how a solution will keep up in the future. I have particular interest in deep learning and visualisation of any form. However, my interests are still flexible to change with new skills acquired. I can work and communicate efficiently in a team.

EDUCATION

Bachelor Artificial Intelligence	AUG 2017
University of Groningen	
GPA: 3.3/Dutch: 7.6	
Courses include e.g.: AI, Computer graphics, Information security, Cognitive psychology	
Bachelor project: The effect of multimodality on the performance of a convolutional neural network.	

Propaedeutic/First year Applied Mathematics	JUL 2016
University of Groningen	

Pre-university education	JUL 2012
Ubbo Emmius	

EMPLOYMENT

Research assistant	MAY-AUG 2018
University of Groningen	
Project "Making sense": Combining multiple types of information to recognise historical drawings of species.	

ADDITIONAL

Selection committee	AUG-DEC 2018
University of Groningen	
Tenure track/Full professor in Continuous Machine Learning	

Practical Reinforcement Learning	JAN 2021
online course/Higher School of Economics	
https://coursera.org/verify/lcmdgvlhnw85	

LANGUAGES

Python	fluent
Git	experienced
C	experienced
Javascript	experienced
R	familiar
JAVA	familiar
C++	familiar
